

Scope of Work

Brine Salt Delivery

Background:

The customer generates steam and chilled water for the heating and cooling of various buildings located throughout the Capitol (Washington, DC area) complex. The customer currently has installed two Brine tanks which feed brine to the steam plant water treatment system for city water used as make-up water for the steam plant. **A response needed NLT Monday, January 9, 2012 by 4:00 pm CT.**

Statement of Work:

The customer is seeking a MAS contractor to provide salt as specified below for use in the treatment system for city water used as make-up water for the boiler plant:

- Provide solar, sodium chloride Type II Form I evaporated non-compressed granular water treatment salt (NSNs: 6810-00-227-0437, 6810-01-026-095)
- The salt will be delivered by pneumatic truck to the customer bulk storage tank in quantities of 25 to 50 tons per delivery, with most deliveries occurring at night or on the weekends. The contract services will occur from January 2012 to January 2013, with the options for continued service that will be detailed in RFP.

Scope of Services:

All deliveries shall be subject to inspection by customer and adhere to that will be outlined. The security screening period which will take approximately 30-45 minutes should be included in quote. Supplier shall provide an hourly cost of demurrage for deliveries that are delayed for more than one (1) hour due to security screening or inaccessibility to the site. Supplier shall also provide a daily demurrage cost of deliveries that are turned away due to site restrictions or any other reason at the customer's request to be rescheduled. The supplier will be notified by the customer when a delivery is required, and will provide the quantity of product and delivery date and time (the customer will provide 24hours notice); supplier shall provide deliveries within 48 hours of being notified by the customer and will provide the customer with 24 hour notice of delivering to the site the name of the driver, vehicle information and approximate arrival time. Supplier must provide a copy of the MSDS with each delivery ticket.
